NICRO Research Documents

The Safe Community Toolbox was developed for the Department of Social Development by NICRO.

Research by Melanie Dugmore and write-up and illustrations by Talita van der Walt.

2016

# How to approach monitoring and evaluation

\*logic refers to one thing following another

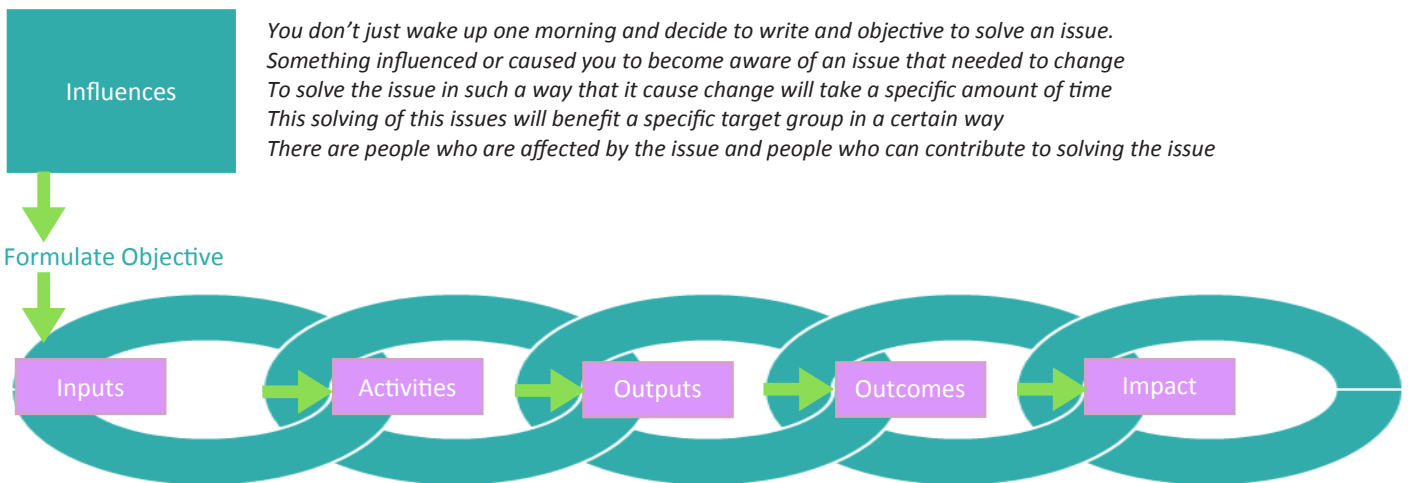

## Plan to monitor and evaluate when you start designing your project

Monitoring and Evaluation is part of an approach to planning and managing projects that is called Outcome Based Measurement.

Outcome based measurement is an universal approach that strengthens accountability and encourages clarity about what your projects is **doing** and what it is **changing**.

Outcome based measurements follow a logic\* chain of events that links resources to activities, activities to products or results, and results to outcomes and impact.

Monitoring and evaluation can not be done at the end of a project, it needs to be designed as part of the logic chain of events when objectives are formulated.

*You don't just wake up one morning and decide to write an objective to solve an issue. Something influenced or caused you to become aware of an issue that needed to change. To solve the issue in such a way that it cause change will take a specific amount of time. This solving of this issues will benefit a specific target group in a certain way. There are people who are affected by the issue and people who can contribute to solving the issue*

*You need certain human and material resources to run the project*

*If you have access to the human and material resources **then** you can use it to do your planned activities*

*If you do your planned activities **then** you can deliver the amount of products or services you aimed for*

*If you deliver the amount of products or services you aimed for **then** your target group will benefit in certain ways*

*If your target group received the benefits **then** certain changes in communities, or systems can be expected*

## Indicators

### Monitor the work you plan to do

### Evaluate the results you plan to achieve

Monitoring is mainly about progress

Evaluation is mainly about results & impact

eg.

- # Staff
- \$ Used
- # booklets
- # partners
- # sessions
- # talks
- #, % showing improvement
- # crimes committed
- Types of changes
- #, % prove of increased knowledge/ skills
- # workshops

- Process Evaluation**
  - Are activities delivered as intended? (fidelity)
  - What are participants reactions?
- Outcome Evaluation**
  - To what extent is desired changes occurring?
  - Who is benefiting/not benefiting? How?
- Impact Evaluation**
  - To what extend is change because of the project?
  - Is project worth resources it costs?

why?

- to **measure** progress against objectives.
- to **document** progress and results of project
- to reveal need for **timely corrective action**
- to promote **accountability** to all stakeholders

- to determine **efficiency** of service delivery,
- to assess **effectiveness** of project/ programme,
- to determine the **impact** of the project/programme
- to estimate the **sustainability** of a project.

**Efficiency** determine the extent to which human and material resources is well used. It tells us if the input is appropriate for the output it achieves.

**Effectiveness** assess the extend to which a project achieves it's objective. It tells us if the project can produce the desired results

**Impact** determines whether or not we are making a difference to the problem we are trying to solve. It tells us if the project is producing change

**Sustainability** estimates the extend to which changes produced by the project are likely to continue after the project ends. It tells us if the changes are lasting.

# Understanding the links in the logic chain

## inputs

The resources you need to do your project activities

Resources are every thing you need in order to do the activities you plan to do.

### Human Resources

**Skills and experience** - do you need people from certain occupations or professions to implement the activity?

**how much time.** Do you need full time employees, part time employees, Volunteers, contractors or consultants.

### Material Resources

**Equipment** - computers, office furniture, tools.

**Materials** - manuals, booklets, stationary, office expenses like telephone and copies

**Venue** - do you need full time office space and how big, do you need some space for specific events only e.g. meetings or workshops?

**Transport** - do you need transportation to do the activity or Taxi fair to facilitate community participation

**Catering** - lunch or teas for workshops

Your inputs will inform your budget.

Remember if your budget changes, your input will change and that will affect your ability to do the activities and achieve the results

## activities

The things you do to deliver the products or services you planned for

You need human and material resources to do your activities.

eg.

Do Training  
Hold a Meeting  
Promote safety  
Network  
Start Groups

Hold workshop  
Keep records  
Write report  
Appoint staff  
Install fence

Bust Shebeens  
Build soccer field  
Hold talks  
Raise awareness  
Raise funds

Make posters  
Create a flyer  
Empower women  
Do a street march  
Do counselling

Clean up streets  
Wash of graffiti  
Mentor youth  
Give food  
Remove barriers  
Play with kids  
Plant a garden  
Help parents  
Start a club  
Build a ramp

## outputs

The direct result or evidence that the activity was delivered

Output - What is the activity "putting" out there?

An output is the direct result of your activity. Outputs can be described in terms of services delivered (types, levels and targets of services to be delivered by the project) or in terms of products produced. Think of it as the evidence that the activity was delivered to the intended target group at the intended rate.

eg.

Activity	Output
Develop a training manual for the ISCPS	ISCPS Training Manual
Facilitate 2 Workshops with Social Workers	2 Full day Workshops conducted
Get bus tickets for 150 participants	150 Bus Tickets
Start monthly youth club meetings	Monthly meetings with 15 youth
Create awareness on dangers of alcohol	3 Talks, Posters put up at 7 shops
Keep records of activities	Reports, Process Notes, Registers

# outcomes

The potential change to individuals and places that results from the activities

Outcomes are the changes to the target groups' knowledge, skills, actions or level of functioning.

**Outcome** - What will "come" out after the activity?

**Short term outcomes** describes the benefits to the target group/place as a result of the activity. It is closely connected to outputs, it describes the potential (the new possibilities) created by the output.

Short term outcomes should be attainable in 1-3 years.

**Medium term outcomes** describe changes in individuals or spaces. You will have fewer medium term outcomes as they will each relate to a few short term outcomes.

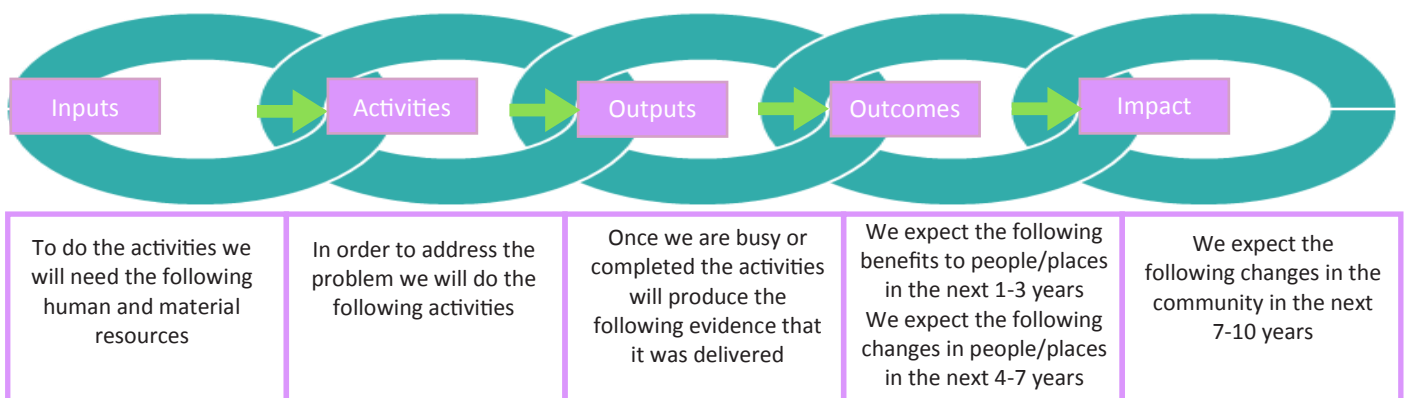

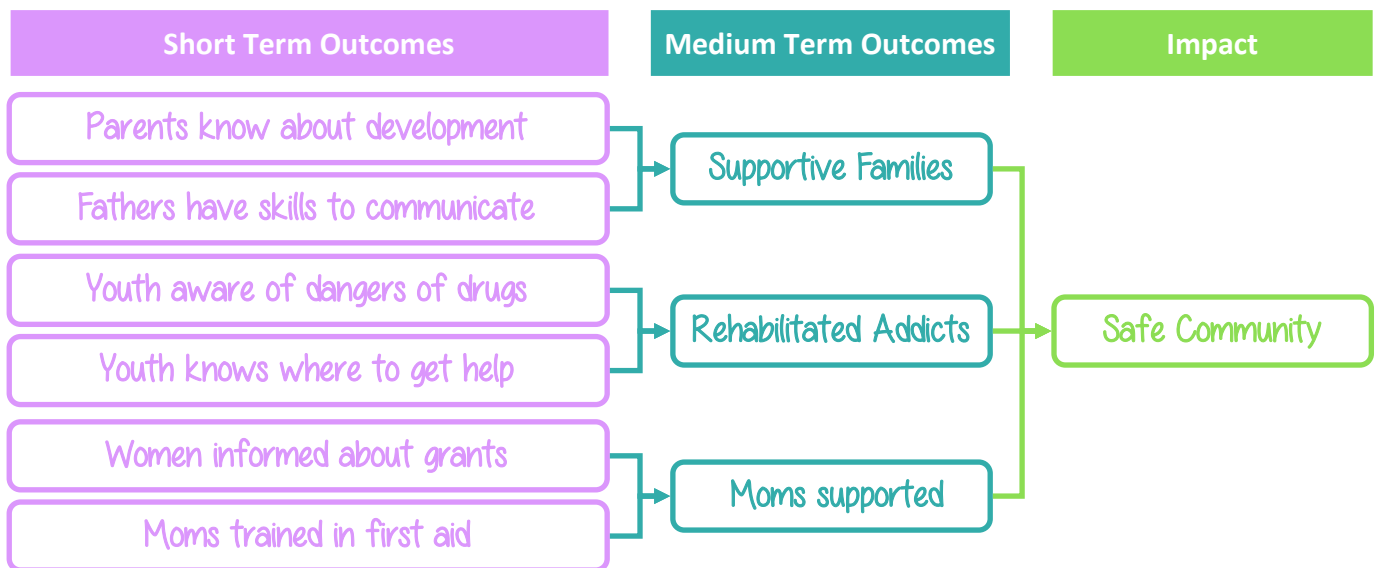

Medium term outcomes should be attainable in 4-7 years

# impact

The potential change to communities and systems that results from the activities

**Long term outcomes or Impact** describe changes that are expected in the community or society. (e.g. improved conditions, increased capacity). Your project alone will not cause this to happen, but it will contribute to bringing it about.

Long term outcomes or impact should be attainable in 7-10 years

# Choosing your indicators

Choose indicators by considering your outputs and outcomes

Just like a car have indicators to show in which direction you are going, projects need indicators to show in which direction it is going. Once you know where to look you will see that there are many indicators that you can check.

You need baseline information to measure your progress against. Baseline information can be found in your Community Safety Profile

- Indicators are found in your Outputs and Outcome statements.
- Indicators must be easy and cost-effective to use otherwise you wont do it.
- There is an endless number of things that can be checked. Decide what is necessary.

Output	Indicator	Means of Verification (how to check it)
ISCPS Training Manual	the ISCPS Training Manual	check to see the physical Manual
2 Full day Workshops conducted	2 Full day Workshops	attendance registers, diary, workshop notes, invoice for catering
150 Bus Tickets	150 bus tickets	the tickets or a invoice for the ticket
Monthly meetings with 15 youth	Monthly Meetings with 15 youth	the minutes or attendance registers, or notes on the meetings
3 Talks, Posters put up at 7 shops	3 Talks, Posters put up at 7 shops	attendance register, diary, report & check venues where posters are
Reports, Process Notes, Registers	Reports, Process Notes, Registers	check the file for the report, notes or register to see if it is there

## How to

# monitor progress

Tool 09 Formulating Objectives

Choose indicators by considering your outputs and outcomes

Start by using Yellow tool #09 to formulate your outcome based objective. It includes a space for the performance indicators for progress. Then Use tool # P01 Monitoring plan to develop your monitoring plan.

Once you have your monitoring plan, you can summarise all the checks you want to do daily, weekly, monthly and so on. Make yourself a checklist to ensure that you get to everything.

Tool P01 Monitoring Plan

## How to

# evaluate impact

Choose indicators by considering your activities and outputs

Monitoring is often about facts and figures, things you can count and see. It is relatively easy to do if you work in a systematic, organised manner.

When you evaluate you make judgements. You weigh the facts that you have analysed against a standard. The standard that you use to judge or weigh, are determined by a combination of

- Theory & Researched facts
- Societal norms (including laws)
- Practice experience (informed opinion)
- Your personal beliefs, attitudes and views

Evaluation is a little more tricky than monitoring. It helps if you have experience in evaluating projects when you do it. If you do not have a person on your team that is familiar with identifying indicators for evaluating, try to get someone from DSD or an NGO to assist you. On the upside, evaluations usually happen further apart than monitoring. Every 3 to 6 months and at the end of a project

- Process Evaluation**
  - Are activities delivered as intended? (fidelity)
  - What are participants reactions?
- Outcome Evaluation**
  - To what extent is desired changes occurring?
  - Who is benefiting/not benefiting? How?
- Impact Evaluation**
  - To what extend is change because of the project?
  - Is project worth resources it costs?

eg.

# TOOL#09

## Formulating Objectives

formulate smart objectives by describing exactly what you want to achieve

## When do you use it?

Someone once said: If you don't know where you are going, how will you know that you got there?

Well formulated objectives lead to successful measurable projects.

When you have established what are the priority issues you want to address in your community, you need to formulate an objective for each one of these priorities

## How to use it?

Complete a "Formulating Objectives Sheet" for each objective.

Before you start, ask yourself the following questions:

- What is the problem you want to fix
- Is there anything that can be changed in the environment to stop or reduce the problem
- What behaviour needs to change (of the victim or the offender) to stop or reduce the problem.
- Who is already working towards this same objective or can assist.

Follow the prompting questions on the top of each block.

Do not complete the blocks in sequence, e.g. you will only know what resources you need once you know what activities you are going to do. This sheet has space for three activities to reach the objective. If you want to add more activities, simply use another sheet and staple the two together.

See the Safe Communities Toolbox [Book 5 Tracking the progress and success of Community Projects](#) for information on the concepts in this tool

## Developing Objectives

helps you describe what you want to achieve

## Who can use it?

- Individuals
- Groups or Teams
- Workshop Facilitators

**Goal:**  
A goal is the big picture, what you want to achieve with many projects  
For us it is: a Safe Community

**Objectives:**  
Each objective is a step you need to take reach the goal

**Activities:**  
Are the different things we do or deliver (produce) to achieve the objective

**Goal:** *Safe community*      **Objective:** *Reduce the amount of car accidents due to DUI by 5 per month by end of march*

Influences	Inputs	Outputs	Responsibility	Monitoring	Outcomes
<b>Problem or issue</b> Lots of car accidents due to DUI	<b>Human Resources</b> Police officers Traffic officer SANCA	<b>Target:</b> Who or what will benefit? Busts of shebeens roadblocks Educational Talks at 2 high schools	<b>Who is responsible to do this by when?</b> Who: SAPS Traffic By When: End October Who: SANCA By When: End January	<b>Performance indicators:</b> How can we check that the activity happened? Police stats	<b>Short Term Outcome:</b> Benefits to target audience because of the activity Less car accidents due to DUI Young people empowered to make better decisions
<b>Who or what is part of the problem?</b> Youth u 18 shebeens that give them alcohol	<b>Material Resources</b> Internet to do research for talk				
<b>Who or what can help with the solution?</b> SAPS and Traffic SANCA					

**Medium Term Outcome:**  
Changes in Individuals/spaces  
*Less DUI because less young people drink and drive*

**Long Term Outcome:**  
Changes in Community  
*safe community with safer roads*

**Objective's Strategy:**  
 Victim based  
 Offender based  
 Environment based

**Goal: Safe community**

**Objective:**  
Who will make what change, by how much, where and by when

Influences	Inputs	Outputs			Responsibility	Monitoring	Outcomes	
<p><b>Problem or issue</b> What is the problem or issue we want to address:</p>	<p>What resources do we need to do the project activities?</p> <p><b>Human Resources</b></p>	<p><b>Activity:</b> What do we need to do to address the problem?</p>	<p><b>Target:</b> Who or what will benefit</p>	<p><b>Output:</b> What is the result or product of your activity</p>	<p><b>Who is responsible to do this by when?</b></p> <p>Who By When</p>	<p><b>Performance Indicator:</b> How can we check that the activity happened?</p>	<p><b>Short Term Outcome:</b> Benefits to target group/place because of the activity</p>	
<p><b>Who or what</b> is part of the problem?</p>	<p><b>Material Resources</b></p>	<p><b>1</b></p>			<p>Who By When</p>			
<p><b>Who or what</b> can help with the solution?</p>	<p><b>3</b></p>				<p>Who By When</p>			
<p><b>Medium Term Outcome</b> Changes in Individuals/spaces</p>		<p><b>Long Term Outcome:</b> Changed Community</p>			<p><b>Impact</b></p>			<p><b>Objective's Strategy:</b></p> <p><input type="checkbox"/> Victim based <input type="checkbox"/> Offender based <input type="checkbox"/> Environment based</p>

<b>Outcome</b>	<b>Output</b>	<b>Indicator</b>	<b>Means of Verification</b> <i>Where will I find the data?</i>	<b>Frequency</b> <i>How often will I check on this</i>	<b>What</b> <i>will it tell me?</i>

# How to get to a safe place

“If you don’t know where you are going, you won’t know when you get there”.

## Safe Communities

# toolbox

The Safe Community toolbox was developed by DSD as a tool to implement South Africa’s Integrated Social Crime Prevention Strategy (ISCPS).

The toolbox is divided into 5 tools that each addresses a part of the process of developing and implementing a community Safety Action Plan.

Tool 1 - Gives an understanding of Crime Prevention and the process of making communities safe.

Tool 2 - Gives information, advice and tools on working together.

Tool 3 - Gives information and tools on how to do a Community Safety Assessment.

Tool 4 - Gives information and tools on developing a Community Safety Action Plan.

Tool 5 - (this tool) gives information and tools on monitoring and evaluating projects.

The tools are available to anyone that wants to initiate a project in their community. It can be used as a resource or as information pieces for interested parties.

In addition to this toolbox, DSD also have training material that gives more in-depth information on all the topics covered in this toolbox.

Contact your nearest DSD office for more information and tools.

Ask for the District Social Crime Prevention Functionary
